Hi Martin,

Craig said he copied you but I didn't see your name in the email. Do you have information to share? New Mexico is getting slammed with questions and we don't have any specifics or data.

I'm literally leaving the office for Durango once this sends. I've copied Martin McComb, who is managing our data, to assist you.

Craig

Subject: Gold king mine
Importance: High

Hi Craig,

I just left you a voice message too. I got your contact information from Mark Hayes. I am hoping I can get data and information directly from you and R8. For example, we need the pH values that have already been determined. I believe this was done yesterday and even possibly the day before. Have there been any observations on what kind of impacts to aquatic life? Have there been any fish kills? Where and when specifically, are the samples being taken? Is there existing data from the containment pond?

Please let me know. We are getting inquiries and do not have any data yet. Thanks.
